

Bradford County Conservation District Pond Assistance Fee Schedule

Updated March 1, 2021

Initial site visit to determine wetland presence/site layout - \$20

- Provide guidance for potential wetland impacts by:
 - Examining plants on-site
 - Taking soil probes to identify presence of hydric soils
- Recommend wetland delineation if needed
- Identifying any near-by watercourses and floodways that may be present
- Educating landowners about wetlands and their role in the environment

Site visit to discuss any physical repairs needed - \$20

- Dredging
- Dam and/or spillway maintenance

Water Quality/ Plant Assessment/ On-Site Management Suggestions - \$50

- Use Hydro Lab to determine baseline water quality readings
 - Temperature, dissolved oxygen, specific conductivity, pH
- Identifying aquatic plants from shoreline
- Discuss possible treatment options or management styles to achieve desired results

Environmental Assessment for Grass Carp Permits - \$75

- Only needed for ponds 5 acres or more
- Identify plant species and their density
- Inspect outlet structures to ensure proper measures are being taken to restrict release of grass carp into surrounding waterbodies and/or watercourses. (Photo documentation required)
- Prepare aerial maps with outlet structures clearly labeled
- Prepare environmental assessment report, include all required documents, and send to appropriate PA Fish and Boat Commission permit reviewer. Some follow up with PAFBC permit reviewer may be needed.

Management Plan Development - Contact BCCD for Quote

- Bathymetric mapping
- Plant ID and reporting
- Management planning
