

Forestry Education Symposium Registration

Please join us for the Spring North Central and Northeast Regional Forestry Education Symposium!

This event is presented by Bradford County, Susquehanna County, and Wyoming County Conservation Districts to provide in-person forestry education to private landowners, loggers, and forestry professionals, to continue and expand knowledge and understanding of forestry practices, forester selection, sustainability, and forest health.

This event will include forestry presentations from local professionals on topics such as managing your woodlot for wildlife, forest disease, invasive species, forestry best management practices and more!

The day will begin with Event Sign-In and Opening Welcome, and will include a light breakfast, catered lunch, and multiple guest speaker presentations to attend throughout the morning. In the afternoon, the [Guided Forestry Tour](#) will take place. This walking tour will travel around Vosburg Neck State Park to highlight previously timbered and properly managed forestry sites. This tour will be hosted by two forestry professionals and allow for discussion about your personal property and recommendations and techniques to improve your woodlot.

Please be sure to dress appropriately for the weather conditions, as the Guided Forestry Tour will take place rain or shine!

When: Saturday, April 1st 2023
